## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-34, drawn to a multi-element impedance probe apparatus.

Group II, claim(s) 35-41, drawn to a composition of matter that is a physiologically acceptable organic salt.

Group III, claim(s) 42-60, drawn to a method of imaging a body tissue.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions are unrelated since one group is directed to composition of a contrast agent whether the other groups are directed to imaging modality or impedance measurement probe.

3. A telephone call was made to William H. Dippert, Reg. No. 26,723 on 10/31/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
